DETAILED ACTION

1. Applicant's response filed on 08/22/2005 has been fully considered. Claim 1 is amended, claim 5 is canceled, claims 21-33 are added, and claims 1-4 and 6-33 are pending. (NOTE: Claims 8-20 are still withdrawn from consideration as non-elected invention).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsuchida et al. (US 2002/0071941 A1).

Tsuchida discloses an ink jet recording medium comprising a homopolymer or copolymer compound containing sulfur (abstract), wherein the compound has a molecular weight range that overlaps with the claimed range [0024] and claims 1-12.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 27 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuchida et al. (US 2002/0071941 A1), as applied to claims 1, 6 and 7, above.

Tsuchida does not disclose the amount of the compound containing sulfur. The experimental modification of this prior art in order to ascertain optimum operating conditions fails to render applicants' claims patentable in the absence of unexpected results. *In re Aller*, 105 USPQ 233. One of ordinary skill in the art would have been motivated to adjust the amount of the compound containing sulfur in order to improve the water resistance and color change inhibition [0025]. A prima facie case of obviousness may be rebutted, however, where the results of the optimizing variable, which is known to be result-effective, are unexpectedly good. *In re Boesch and Slaney*, 205 USPQ 215.

Allowable Subject Matter

6. Claims 21-26 and 33 are allowed.

7. Claims 2-4, 28 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Tsuchida neither teaches nor suggests the use of an inhibitor of poly(1,4-phenylene sulfide) or poly(1,3-phenylene sulfide), and the use of inhibitor having the claimed melting temperature and glass transition temperature.
